SUMMARY

I am a dedicated and proactive Software Engineering student pursuing a BSc (Hons) in Software Engineering at ICBT Campus. My enthusiasm for Software Engineering extends well beyond the classroom, as I continually engage in self-directed learning to deepen my understanding of the field.

I possess a robust foundation in programming languages including Java, JavaScript, and Python, and have hands-on experience with modern frameworks such as React.js, Next.js, as well as backend technologies like Node.js, Express.js, and Prisma. My technical expertise is complemented by a passion for developing innovative software solutions through personal projects and collaborative ventures.

EXPERIENCE

FullStack Software Engineer

Lakion

As the Frontend Developer i spearheaded the creation of Blog Site,A collabarative project encompassing HTML ,CSS,TAILWIND CSS,NEXT JS.It an register ,logging create a memorial. updating the user details. delete memorials and updating memorials.also user can log out the site.

This project is a freelancing project

EVENTZ

The goal is to develop a new website addressing the complexities of events planning. This platform aims to serve as a comprehensive hub where users in Sri Lanka can effortlessly access a range of services essential for events, such as DJs, sound equipment, and decorations. By consolidating these offerings into a single platform, individuals no longer need to navigate multiple resources or rely on various social media platforms.This project is my university project.

Used Technologies : - Next Js, Prisma, Mongo DB,Nodemailer.Cloudinary

LAB APPOINTMENT SYSTEM

I developed a lab appointment system only front end.it haveadmin dashboard and user dashboard.user roles can resgister and successfully logging to their user role pages. (user can resgister as user and logging to user account).admin can add admin role only.they cant resgiter the page.

This is a freelancing project i have done.
